

السادة/.....

السلام عليكم ورحمة الله وبركاته،،، تحية طيبة وبعد

يمثل التدريب العملي أهمية قصوى لصقل معارف الطالب العلمية، ويساهم بشكل أو بآخر في إكسابه الخبرة العملية لممارسة واجباته تجاه خدمة المجتمع. كما أن التحاقه ببرنامج تدريبي عملي هو شرط أساسي ومطلب للتخرج وذلك خلال الفصل الدراسي الثاني حيث يبدأ التدريب بتاريخ 2026/06/28 ، ولمدة شهرين أو أكثر مع التنويه بأن الفترة الالزامية لتدريب الطالب والتي سيتم تقييمه عليها هي 8 أسابيع فقط والمدة المتبقية من فترة التدريب اختيارية للطالب.

وانطلاقاً من مبدأ التعاون بين كلية علوم الحاسب وتقنية المعلومات بجامعة الإمام عبد الرحمن بن فيصل والإدارات الحكومية والقطاعات الخاصة لإتاحة الفرصة لتدريب وتأهيل الطلبة علمياً وعملياً وسعياً لتحقيق الأهداف المشتركة، عليه نأمل من إدارتكم قبول تدريب الطالب/ه الموضح/ة بياناته أدناه ومنحه فرصة التدريب لديكم في مجال تخصصه وتزويدنا بخطة التدريب.

اسم الطالب/ة:	لينه علي ابراهيم التركي	الرقم الجامعي:	2220005219
---------------	-------------------------	----------------	------------

الرجاء توقيع وختم الخطاب مع ارفاق الخطة التدريبية للطالب/ة وارساله الى بريد وحدة التدريب التعاوني

training.ccsit@iau.edu.sa

مع خالص التحية والتقدير،،،

د. مي الدوسري

عميد كلية علوم الحاسب وتقنية المعلومات

د. خالد بن عدنان العيسى

الخطة التدريبية / Training Plan

المهام / Tasks	الأسبوع / Week
Introduction to the IT department structure and policies. Overview of normal IT operations, including handling software and hardware support requests, user communication, and escalation procedures.	الأسبوع الأول Week1
Handling daily IT operations related to software and hardware. Installing, configuring, and troubleshooting operating systems and applications. Basic hardware troubleshooting for computers, peripherals, and printers.	الأسبوع الثاني Week2
Service Desk implementation and administration. Handling incidents and service requests using helpdesk software. Configuring request templates, business rules, workflows, custom functions, field rules, scripts, reports, and system integrations. Monitoring SLAs and ticket lifecycle management.	الأسبوع الثالث Week3
Introduction to SharePoint and its use in organizations. Creating and managing SharePoint sites and document libraries. Managing permissions, version control, and supporting collaboration for IT operations.	الأسبوع الرابع Week4
Creating and managing SharePoint Lists. Customizing list columns, views, and data validation. Using SharePoint Lists to support IT operational tracking and request management.	الأسبوع الخامس Week5
Introduction to Power Apps (Canvas Applications). Creating Power Apps connected to SharePoint Lists. Designing forms and screens to support IT and operational processes.	الأسبوع السادس Week6
Introduction to Power Automate. Creating automated workflows, notifications, approvals, and integrations with SharePoint, Power Apps, and Service Desk systems to improve IT operational efficiency.	الأسبوع السابع Week7
Supporting daily IT operations and end-user requests. Handling real software and hardware incidents under super vision. Updating and resolving helpdesk tickets, maintaining documentation, and assisting the IT team with routine operational tasks.	الأسبوع الثامن Week8

Respected\

Practical training is an important step for refining students' scientific knowledge and contributes to enhancing students' practical experience of practicing their duties towards community service. Graduation requirements include a practical training program during the 2nd term, starting from 28/06/2026, for 2 months or more, noting that the mandatory period for the training, for which he will be evaluated, is only 8 weeks, and the remaining period of the training is optional for the student.

As part of the cooperation between the College of Computer Science and Information Technology at Imam Abdulrahman Bin Faisal University and government and private sectors to provide the opportunity to train and qualify students scientifically and practically to achieve common objectives, we hope that you can accept the student, his/her details shown below, to get the best training opportunity in his/her field of specialization and provide us with the Training Plan and inform us if the application is accepted.

Student Name:	Linah Ali Alturki	Student ID:	2220005219
----------------------	-------------------	--------------------	------------

Please sign and stamp the letter and send it with the Training Plan to the Cooperative Training Unit email: training.ccsit@iau.edu.sa

Dr. Khalid Alissa

Dean of College of Computer Science and Information Technology

For more information about Bachelor of Science in Computer Science study plan at College of Computer Science and Information Technology, you may visit the college website:

Bachelor of Science in Computer Science Study Plan	

Technical Skills for Computer Science Students:

- Programing skills
- Technical report writing
- Software development
- Project management
- Web development
- SQL & Database
- Operating Systems Linux
- Computer Network

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications

كلية علوم الحاسب وتقنية المعلومات | College of Computer Science and Information Technology

For more information about Bachelor of Science in Computer Information Systems study plan at College of Computer Science and Information Technology, you may visit the college website:

Bachelor of Science in Computer Information Systems Study Plan	

Technical Skills for Computer Information Systems Students:

- System Analysis and Design
- Report writing and presentation
- Project management
- Dealing with Databases
- Application of IT solutions for organization
- Programming skills
- Business process awareness

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications

For more information about Bachelor of Science in Cyber Security and Digital Forensics study plan at College of Computer Science and Information Technology, you may visit the college website:

Program link	QR Code
Bachelor of Science in Cyber Security and Digital Forensics Study Plan	

Technical Skills for Cyber Security Students:

- Design and development of security systems
- Testing and analysis of security systems
- Installation and Configuration of security tools
- Forensics investigation of security systems
- Detection and prevention of threats / vulnerabilities in security systems
- Active and passive penetration testing for analyzing secure systems
- Identify, plan and implement strategies to mitigate security risks

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications

For more information about Bachelor of Science in Artificial Intelligence study plan at College of Computer Science and Information Technology, you may visit the college website:

Program link	QR Code
Bachelor of Science in Artificial Intelligence Study Plan	

Technical Skills for Artificial Intelligence Students:

- Conceptualization of a machine learning project or idea
- Solve data processing problems
- Data visualization
- Carry out data cleaning and other preprocessing tasks including outlier detection and treatment, missing values treatment, etc.
- Build machine learning models following established standard practice towards letting the data speak
- Improving models accuracy by optimizing hyperparameter values of the ML algorithms
- Discuss Machine modeling outcomes and use appropriate visualization tools to aid results discussions
- Developing Intelligent Software Applications
- Exploratory data analysis
- Building dashboards for Intelligent Systems
- Developing Machine Learning models for various AI applications areas like business, oil and gas, security, etc.

Soft skills:

- Problem solving
- Critical thinking
- Creativity
- Teamwork
- Communications
